Service Description and Rate Card — SGC-SD-2026-01

SGC-SD-2026-01

Service Description and Rate Card

Client-facing schedule to SGC-MSA-2026-02 — describes the Subscription Services, screening signal, reports, fair-use, account states, and rate card

Effective on	the date of the later signature	Companion to	SGC-MSA-2026-02 (Master Services Agreement)
Entity	SGC TECH AI — Scholarix Global Consultants FZCO, IFZA-Licensed, Dubai, UAE	Classification	Client-facing schedule
Governing law	<i>[LEGAL REVIEW REQUIRED — see MSA §14 — DIFC substantive law vs. forum confirmed with UAE counsel]</i>	Status	Non-binding until the Order Form and MSA are signed

SD §1 — Service description

The Subscription Services comprise a full, end-to-end Real Estate Operating System, delivered on a hosted, tenant-isolated platform. Core capabilities include:

- AI-powered CRM with WhatsApp integration — lead capture, client conversations and automated nurture sequences;
- AML screening signal against supported lists;
- Secure digital client-intake form with document upload;
- Generation of compliance records and reports;
- Sales and Invoicing — quotations, sales orders and invoicing workflow;
- Basic Financial Reports;
- Commission Engine — agent and broker commission calculation and tracking;
- Portal and website property-listing integration (see SD §9.3 for integration scope);
- Customisable interface, including interface branding colours;
- E-invoicing readiness for the UAE e-invoicing mandate.

The platform is provided as a monthly subscription, billed in advance on the selected monthly, quarterly, half-yearly or annual cycle. Monthly billing is at the list price, with no rebate.

Service Description and Rate Card — SGC-SD-2026-01

SD §2 — Screening signal: results, list scope, currency

2.1 Lists at launch

At launch the platform screens against the following lists only:

- The UN Consolidated List;
- The UAE Local Terrorist List.

OFAC and EU lists are NOT in launch scope; they are available as additional lists, quoted separately. PEP and adverse-media screening is NOT in launch scope. Additional lists, when added, are documented in a separate Schedule.

2.2 Three results, and only three

Result	What the platform does	Client action
(a) NO MATCH	Records and prints: "No match found against [list names] as at [list version and last-updated timestamp]." The platform must NEVER output "clear", "clean", "approved", "compliant" or "verified".	Client records the result in its own compliance file.
(b) MATCH REQUIRING HUMAN REVIEW AND ENHANCED DUE DILIGENCE	Names the list matched; shows the matched record; requires a recorded disposition (reviewer, conclusion, reason).	The decision to proceed is the Client's. SGC does not decide, does not advise, and does not notify.
(c) MATCH ON A TARGETED FINANCIAL SANCTIONS LIST (UN Consolidated List or UAE Local Terrorist List)	Displays the MANDATORY action path — not a review prompt. TFS obligations require freezing without delay and notification to the Executive Office for Control and Non-Proliferation (EOCN).	The Client must discharge the freeze and notification obligation. Tipping-off prohibitions apply. The platform surfaces the obligation; it does not discharge it and notifies no authority on anyone's behalf.

The platform does NOT route any non-UN, non-UAE-Local list hit into the mandatory freeze path. The platform does NOT route a UN or UAE Local hit into the review-only path.

2.3 List currency

- Lists are refreshed on a published cadence (daily incremental, weekly full reload).
- The last-updated date is displayed on every result and report.
- Screening is blocked if a list is older than the configured staleness tolerance.

Service Description and Rate Card — SGC-SD-2026-01

2.4 Disclaimer

SGC does not warrant that any list is complete or accurate, or that any match or non-match is correct; list content is produced by third parties and authorities. The tool is SUPPLEMENTARY and does not replace the Client's own registration with the EOCN automatic reporting system.

SD §3 — Reports: formats, and the draft-and-approve control

The platform may generate records, schedules, evidence packs and other outputs based on the data available within the Client's tenant. Outputs are provided for Client review and submission where required. SGC does not represent the Client before a government authority and does not submit regulatory filings in the Client's name unless a separate written service agreement expressly provides otherwise.

Generating a record is not the same as making a regulatory filing. The subscription does not transfer the Client's regulatory responsibility to SGC.

Reports are produced in draft form and require a recorded approval by the Client's named approver (specified in the Order Form) before they may leave the platform. The platform records the approver, the approval timestamp, and the version approved. SGC is not the approver of record and does not certify any output.

SD §4 — Responsibility boundary

4.1 SGC's warranted obligations — exactly four, and no more

#	SGC warrants
1	Availability of the platform at the SLA service level (SGC-SLA-2026-02).
2	Security of data on SGC infrastructure, and breach notification without undue delay (and in any event as soon as SGC becomes aware, with 72 hours as the outer limit).
3	List currency — lists refreshed on a published cadence, with the date visible on every result and report.
4	Output format — reports in the structure the relevant published format specification requires as at release.

Everything else is the Client's:

- All configuration (thresholds, retention, users, permissions, report sets);
- Accuracy and legality of data entered or imported;
- Every compliance decision, including whether to proceed on a screening result;
- Review and approval of every output before it leaves the platform;
- All filing, submission and registration;
- Its own regulatory registrations, appointments and licences;

Service Description and Rate Card — SGC-SD-2026-01

- Retention and production of records.

4.2 Explicit non-warranties

- SGC does not file, submit, register or report to any authority;
- SGC is not a registered tax agent;
- SGC is not anyone's MLRO or Compliance Officer;
- SGC gives no legal, tax or compliance advice;
- SGC does not warrant that use of the platform makes any Client compliant with any law or regulation.
- SGC does not warrant the availability, functionality or continued operation of third-party services or APIs that the Platform integrates with (including messaging platforms such as WhatsApp Business); changes to third-party terms, APIs or availability outside SGC's control are excluded from the Uptime Commitment and from SGC's warranties;
- Basic Financial Reports and Sales and Invoicing outputs are generated from data in the Client's tenant for the Client's internal use; they do not constitute audited financial statements, tax advice, or a substitute for professional accounting or tax services;
- Commission calculations are performed according to the rules, rates and structures configured by the Client; SGC does not warrant the accuracy of Client-configured commission rules and is not responsible for disputes arising from them.

PDPL processor duties are statutory and are not shifted by any contractual wording. The Client's regulatory record-keeping obligations are its own and remain so regardless of account state.

SD §5 — Configuration and disclosed defaults

Configuration item	Default shipped	Client-editable
AML screening match threshold	Default accepted (configured tolerance)	Yes
Record retention period	5 years (disclosed on screen)	Yes (subject to minimum 5-year statutory floor)
User accounts and permissions	Configured by Client administrator	Yes
Report sets	Standard published formats	Yes (per published specification)
Account-state transitions	Per SD §7	No (statutorily required defaults)

Service Description and Rate Card — SGC-SD-2026-01

SD §6 — Fair use and included allowances

6.1 Pooled metered operations

- 1,000 metered operations per licensed user per month, pooled at tenant level (5,000 at the floor; 10,000 at ten users; scaling with the ladder).
- Short-term ceiling: 60 calls per minute.
- NEVER metered, NEVER throttled, NEVER capped, NEVER blocked: AML screening searches, and audit-trail writes.
- Document storage: 5 GB per tenant included; additional storage quoted.

6.2 Behaviour at thresholds

- At 80% of allowance: Client notified, no effect on service.
- At 100%: non-urgent background work queues to the next cycle; interactive use continues; nothing is lost.
- Sustained material excess: SGC contacts the Client to agree a higher allowance or a metered rate. SGC does not silently bill overage and does not disable an account for exceeding an allowance.

6.3 Screening reference volume

A fair-use REFERENCE volume of 500 searches per month per tenant is published, expressly stated as a commercial trigger for a conversation and NOT a technical cap, block or throttle.

No allowance, no throttle and no payment state can cause a compliance control to fail.

SD §7 — Account states and continuity

State	Function	Trigger
Active	Full function	Current cycle paid
Grace	Full function, no restriction; SGC may send overdue notices	Days 1–7 after the due date
Read-only	Log in, view all records, run all reports, FULL DATA EXPORT; writes and outbound calls suspended; nothing deleted or hidden	From day 8 after the due date, until paid or archived
Archive	All access suspended; data retained for 60 days; restored in full once all overdue amounts are paid (a reinstatement fee of AED 500 may apply)	From day 30 after the due date if unpaid, or 30 days after termination takes effect
Deletion	Permanently removed; SGC has no further obligation to retain, restore or export data. Export before this date.	60 days after the Tenant enters Archive

DUBAI DU 0000
United Arab Emirates

Service Description and Rate Card — SGC-SD-2026-01

There is no undefined gap between states. Non-payment never transfers ownership of Client data to SGC. The Client's regulatory record-keeping responsibilities remain its own regardless of account state.

{placeholder:delivery:30-day backup retention, quarterly restore test, RPO 24 hours, RTO 8 hours — confirm these objectives are in place}

SD §8 — Support and service levels

Service levels are governed by SGC-SLA-2026-02. The default tier (Standard) provides business-hours support (Mon–Fri, 09:00–18:00 GST) with P2/P3/P4 response and the P1 commitment per SLA §3. P1 (Critical) and out-of-hours P2 require the 24/7 Support Add-on, documented in a separate Schedule.

SD §9 — Not included, and roadmap

9.1 Not included

- New modules, features, or integrations beyond those listed in SD §1 (quoted separately);
- Data migration beyond the included 1,000 records (see SD §10);
- Third-party software licensing, hosting, or services;
- Client-side training (quoted separately);
- Regulatory filings, registrations, or representation of any kind;
- Work arising from Client-side modifications, custom code, or unsupported integrations.

9.2 E-invoicing

The platform is E-invoicing Ready — it produces structured invoice data compatible with the UAE e-invoicing mandate. Appointment of an Accredited Service Provider (ASP), all ASP subscription and transaction fees, and any FTA-side registration remain the Client's responsibility. No ASP interface is included or promised; any such work is scoped, quoted and agreed separately.

Phase dates (Client planning only — the Client confirms its own deadline with its own tax adviser):

Client revenue band	ASP appointment deadline	Go-live
Revenue ≥ AED 50m	30 October 2026 (extended from 31 July 2026)	1 January 2027
Revenue < AED 50m	31 March 2027	1 July 2027
Government entities	31 March 2027	1 October 2027

9.3 Portal and third-party integration scope

The portal and website property-listing integration described in SD §1 means the platform is technically ready to connect — the connection itself is not included and is out of scope of the Subscription.

Actual integration with a property portal or similar service requires:

- The Client's own account, credentials and API access with that portal or service;
- The necessary permissions and API keys issued by the portal or service to the Client;
- Field mapping between the Client's data and the portal's required data structure;
- Any other technical configuration specific to that portal or service.

This work — including field mapping and any other technical integration requirement — is scoped and quoted separately from the Subscription.

The same applies to any other third-party platform or service integration, including social and advertising platforms such as Meta (Facebook/Instagram) and similar third-party software: connection readiness does not include the integration work itself, which is quoted separately.

9.4 Roadmap

Capabilities released during a paid subscription are provided at no additional charge. Future capability is described as roadmap only — never dated, never committed to a specific release window.

SD §10 — Rate card

10.1 Subscription floor and additional users

Floor: AED 875 per month, includes 5 licensed users. No package below this. Each additional user is charged per month at the rate below, on the same billing cycle and with the same rebate:

User band	Rate	Notes
Users 1–5	AED 875/month floor	Included in the subscription floor
Additional users (6 and above) — founding rate	AED 50/user/month	Held while the subscription stays continuously active
Additional users (6 and above) — standard rate	AED 75/user/month	Clients outside the founding cohort

SGC TECH AI (Scholarix Global Consultants FZCO)

Al Maseed Building Office No. 304, 119/12st
Al Rigga
DUBAI DU 0000
United Arab Emirates

Service Description and Rate Card — SGC-SD-2026-01

10.2 Additional users on each cycle

Additional users are billed in advance with the subscription on the Client's selected cycle, at the monthly rate above multiplied by the months in the cycle, less the cycle rebate in §10.4. The number of licensed users is stated in the Order Form.

10.3 Cycle prices (AED, excl. 5% VAT)

Package	Monthly	Quarterly	Half-yearly	Annual
5 users (floor)	875.00	2,625.00	5,118.75	9,975.00
Each additional user — founding rate	50.00	150.00	292.50	570.00
Each additional user — standard rate	75.00	225.00	438.75	855.00

Arithmetic basis (footnote): monthly = the monthly list rate; quarterly = 3 × monthly list; half-yearly = 6 × monthly list less 2.5%; annual = 12 × monthly list less 5%.

10.4 Billing rebates

Cycle	Rebate	Basis
Monthly	0%	List price; no rebate
Quarterly	0%	List price
Half-yearly	2.5%	Of the list price
Annual	5%	Of the list price

All cycles payable in advance. Rebates apply to the list price. Rebates are available on all cycles to all clients (not founding-cohort only).

10.5 Build credit

Rent fees paid accrue credit toward a future owned Build (one-time implementation engagement) as follows:

Cycle	Build credit accrual rate
Annual	25% of fees paid
Half-yearly	15% of fees paid
Quarterly and Monthly	0% (no credit accrues)

- Capped at 25% of the Build fee.
- Applies to the Build fee only — never to Care, never as cash.
- Accrues on cleared payments only.

SGC TECH AI (Scholarix Global Consultants FZCO)

FINANCE · SYSTEM · TECHNOLOGY

SGC TECH AI (Scholarix Global Consultants FZCO)

Al Rigga
DUBAI DU 0000
United Arab Emirates

Service Description and Rate Card — SGC-SD-2026-01

- Forfeited if the subscription lapses.

10.6 Onboarding fee

Item	Fee	Notes
Onboarding fee	AED 1,500	Waived for the founding cohort of ten
Data migration — standard	Included	Up to 1,000 records
Data migration — large historic	AED 0.25 per record	Minimum AED 1,000; quoted separately

10.7 Founding rate

The founding rate is held for as long as the subscription remains continuously active; it is lost only on lapse and restart, when the then-current published rate applies. The founding rate is partly consideration for feedback: a named reference, a written case study on request, and structured feedback during the first two cycles (per the Order Form and MSA).

Acceptance

This Service Description is incorporated by reference into the MSA (SGC-MSA-2026-02) and forms part of the contractual documentation. It is non-binding until the Order Form and MSA are signed by both parties.
